## 2022 Annual Montana Dispensing Fee Survey

The Department of Public Health and Human Services (DPHHS) is performing the annual pharmacy dispensing fee survey as required by Administrative Rules of Montana (ARM) 37.86.1105. Understanding pharmacies' true cost of dispensing prescriptions is an important factor in assessing the reimbursement needed to sustain a strong network of pharmacies to serve Montana Healthcare Program members. To ensure DPHHS has the most comprehensive information available to provide your pharmacy a reasonable dispensing fee, we request you complete a confidential survey.

### Important Information

- An online survey will be utilized. Access the online survey on the [2022 Montana Healthcare Programs Dispensing Fee Survey page](#). **Please note that the website has changed and may look different than it did in previous years.**
- A **separate** survey for **each** Montana pharmacy is required.
- Please provide the **most recent year's worth of data**. The most recent years' worth of data will depend on how your accounting books are completed.
- For new providers, the survey should be completed and based on **six months** of operation.
- Failure to respond to the survey will result in an assignment to your pharmacy of the minimum dispensing fee based on the lowest calculated cost to dispense, as stated in ARM 37.86.1105 (3)(a) and (3)(b). The lowest calculated cost to dispense is currently \$4.32.
- If your pharmacy's calculated cost to dispense a prescription is less than the established dispensing fee for Montana Healthcare Programs, then the lesser dispensing fee will be applied in the computation of the payment.
- The deadline for the survey is **August 26, 2022**.

**You will have the ability to print or save your survey submission after you have clicked Submit. Save a copy of your submission for your records.**
