

MONTANA HEALTHCARE PROGRAMS NOTICE

June 3, 2022

Inpatient Hospital Providers

Effective Immediately

REISSUED

Condition Code – LARC Immediately After Delivery

Effective immediately, Montana Healthcare Programs require hospitals to utilize condition code "MV" when a LARC is inserted at the time of delivery. This condition code does not impact payment but is an informational condition code allowing the Department to better understand the utilization of LARCs immediately after delivery.

Reminder

Long-acting contraception (LARC) such as IUDs and contraceptive implants are shown to be safe and highly beneficial when inserted immediately postpartum.

Montana Healthcare Programs allows PPS hospitals to unbundle LARC devices and insertion from the inpatient delivery claim. These services are to be billed as an outpatient service on a 13X type of bill and are paid at the OPPS rates. The following HCPCS/CPT codes are allowed:

Contraceptive Implant

- 11981 – Insertion of drug delivery implant
- J7307 – Implanon/Nexplanon, etonogestrel (contraceptive) implant system, including implant and supplies, up to 3-year duration

Intrauterine Contraceptive Device

- 58300 – Insertion of intrauterine device
- J7296 – Kyleena, levonorgestrel-releasing intrauterine contraceptive system 19.5 mg, up to 5 year duration
- J7297 – Liletta, levonorgestrel-releasing intrauterine contraceptive system 52 mg, up to 3 year duration
- J7298 – Mirena, levonorgestrel-releasing intrauterine contraceptive system 52 mg, up to 5 year duration
- J7300 – ParaGard, intrauterine copper contraceptive, up to 10-year duration
- J7301 – Skyla, levonorgestrel-releasing intrauterine contraceptive, 13.5 mg, up to 3-year duration
